

Company Description:

TCE Construction is a concrete and earthwork subcontractor based in Northern Colorado serving commercial and residential builders across the Front Range since 1998. TCE specializes as a one stop subcontractor for site excavation, foundation construction, site concrete and underground utility services. Being a multiple trade subcontractor helps alleviate scheduling conflicts in the field, streamlining a more efficient bid process, and faster project completion.

Job Title:

Estimator

Job Description:

As the junior estimator, you will aid the estimation team in the bid process by assisting with takeoffs and bid packaging, being involved in bid & scope review meetings as well as postmortem analysis of previous bids. This role will also assist various project administration duties as required of the estimation department. This role will use ProEst Estimating Software, Procore Project Management Software as well as other specific software to the industry.

Minimum Requirements:

Basic understanding of construction plans. Good time management skills. Dependable with a reliable means of transportation. Understanding of estimating, takeoff software and the standard bid process is a plus. Knowledge of earthwork, concrete and underground utility scopes is a plus.

This position has career advancement opportunities within the company for proven candidates.
