

About Braconier:

Braconier Plumbing and Heating Company is a full-service mechanical contractor located in Denver, CO. We have been in business since 1906 and do work primarily in the front range of Colorado. Braconier is a union shop and self performs plumbing and pipefitting. Our focus is medium to large commercial and industrial construction projects including new ground up buildings, remodels, hospitals, data centers, schools and aerospace. We are committed to providing a safe working environment using highly trained and skilled craftsman that will provide a high-quality service. We believe our experience and level of service will prove to have exceptional value to our customers.

Posting Info

We are looking for individuals who are currently enrolled in a Construction Management program, Engineering program, and interested in the mechanical side of construction. Employment is based on 40 hours per week, working out of the Denver office. We offer competitive compensation based on experience and aptitude.

Things you will learn during internship:

- Subcontractor relations
- Contractor relations
- How plumbing and HVAC systems are installed and how they work
- Coordination of supplies and manpower
- The processes of construction and estimating
- Construction document management

What will be required of you:

- Good computer skills (Excel, Bluebeam, and cloud-based PM software)
- Good time management skills
- Ability to effectively communicate with others
- Full time commitment during internship
- Great attention to detail

If interested, please Email StevenV@braconier.com or call 303-777-3037
