

Boyd Jones Construction is seeking exceptional students that are excited about working in the construction industry to participate in our intern program. Our Interns have the opportunity to work part-time during the school year and then full time over the summer.

Boyd Jones Interns can expect to receive:

- Valuable work experiences that provide opportunities to “try on” construction jobs before graduation.
- Become part of the Boyd Jones team, working side-by-side construction professionals that have a passion for their work and look forward to sharing experiences with you.
- Meaningful work assignments that prepare you for your first day on the job after graduation.
- Professional mentors and opportunities to network with experienced professionals within the construction industry.
- Opportunities to learn and use classroom curriculum in real world challenges.
- Earn an excellent hourly wage.

Primary Job Responsibilities:

Assist Superintendents, Project Engineers and Project Managers in the numerous daily activities on a building construction project. You will have opportunities for hands-on experience on the job site and/or the office, providing you with experience within these disciplines:

- Construction Management
- Construction Quality Control
- Cost Estimating
- Construction Administration
- Safety

Qualifications:

- Enrollment in an accredited university in a Construction Management, Construction Engineering or related program.
- Valid drivers license and ability to commute to job sites.

Required Skills:

- Analytical and math skills

- Good communication skills, written and interpersonal
- High initiative, a self-starter
- Problem-solving approach to challenges
- Ability to ask questions, clarify requirements, and learn new things
- Computer skills in word processing, spreadsheets and internet based software
