## **Webcor Overview**

Webcor is a full-service commercial builder headquartered in San Francisco, known for shaping iconic skylines, constructing state-of-the-art hospitals, developing university campus infrastructure, and creating cutting-edge transportation hubs across California and beyond. Founded in 1971, Webcor has grown to become one of California's largest and most experienced general contractors, employing approximately 1,000 full-time employees, including 400 salaried staff and 500 union workers, with regional offices in Alameda, San Jose, Los Angeles, and San Diego.

Webcor is recognized for its innovative, bold, and solution-oriented approach to both public and private projects. With a reputation built on strength of experience and client confidence, the company consistently delivers landmark projects and maintains an enduring presence in the construction industry. The comprehensive service offerings include preconstruction, construction, self-perform, and project management/construction management (PM/CM), ensuring exceptional results across sectors such as aviation, civil/cultural, commercial, education, federal, healthcare, infrastructure, hospitality, mixed-use, parking, residential, and retail.

What sets Webcor apart is its self-performing capabilities in concrete, drywall, timber, carpentry, and equipment, enabling the company to maintain high levels of quality and efficiency at every stage of a project. The company's commitment to excellence, innovation, and collaboration has earned it a reputation as an industry leader. With revenues exceeding \$1.3 billion in 2023, Webcor is financially solid and poised for continued growth.

Ranked consistently among the best places to work, Webcor fosters a positive work culture and prioritizes employee satisfaction. The company's core values of boldness, innovation, trust, craftsmanship, and community are central to its success and the success of its projects. Those seeking to be part of a team that thrives on excellence, collaboration, and impactful construction are encouraged to explore opportunities with Webcor.

## **Internship Information**

Webcor's internship program offers a unique opportunity to experience what day-to-day life as a Project Engineer (PE) would be like. The internship spans 10 to 16 weeks during the summer, with positions available in both the San Francisco Bay Area and Los Angeles, CA. Interns will be immersed in hands-on learning and gain practical experience by participating in various tasks such as maintaining drawings, assisting with CPM schedules, and supporting the project team with submittal processing and RFIs. You'll have the chance to contribute to field surveys, quality control inspections, and inventory management, closely mirroring the daily responsibilities of a Project Engineer.

Beyond the technical skills, the internship is designed to foster growth through team-building experiences. Throughout your time with Webcor, you'll engage in extracurricular activities like going to baseball games, job site walks, and other fun events that help build relationships with your fellow interns and team members. This well-rounded experience ensures that you not only develop your professional abilities but also create lasting connections with others in the industry.
