## OUR HISTORY

Mountain Craftsman llc/ Construction Technologists was created 30 years ago while Grego was a CM GTA student working on his master's degree. He started building decks and finishing basements. He moved on to additions and remodels and received his General Contractor's License in Fort Collins. Our most notable feats were moving an entire house on I-beams and Wheels 45 miles up Red Feather Canyon and put it on our prebuilt foundation. Grego trained himself on the Survey total We suspended a house and dug/built a Basement Foundation under it and set the house back down. He was able to put a single roof over several hodpoge home additions that every other contractor thought was impossible.

## Builder Trainee Opportunity

We are Looking for an excited construction minded individual that wants to learn residential construction. We are starting a new home build from scratch. You will be there for all phases of the Build. Must have Transportation to Severance Colorado. Just 8 Miles east of Fort Collins. We will supply tools, bags and power tools.
