

Ames Construction

7001 Tower Road, Suite D
Denver, CO 80249
T-303-363-1000

The Project Engineer supports the planning, coordination, and execution of heavy highway and civil construction projects at Ames Construction to ensure work is performed safely, efficiently, and in compliance with contract requirements. This role works closely with project management, field supervision, subcontractors, and inspectors to deliver high-quality infrastructure projects, including roadways, bridges, and other civil structures.

Key Responsibilities

- Assist in the planning, coordination, and execution of construction activities to support project schedules and budgets
- Design, review, and implement temporary works and construction means and methods with a strong emphasis on safety
- Inspect installed work, equipment, and materials; identify issues and coordinate corrective actions as needed
- Provide on-site direction and technical support to foremen, crews, and subcontractors
- Monitor project progress and prepare accurate daily reports, quantities, and documentation
- Perform quality control inspections to ensure work complies with contract documents, plans, and specifications
- Verify materials and workmanship meet project requirements and approved submittals
- Enforce safety policies, OSHA regulations, and proper use of PPE on the job site
- Support project cost tracking, schedule updates, and coordination with project stakeholders
- Assist with communication between the field, project management, owners, and inspectors

Qualifications

- Bachelor's degree in Engineering or a related engineering discipline
- Minimum of one (1) year of experience as a Project Engineer, Field Engineer, or similar role in heavy civil or highway construction
- Strong understanding of construction methods, equipment, and materials used in civil infrastructure projects
- Working knowledge of OSHA regulations and job-site safety practices
- High attention to detail with strong organizational skills
- Excellent written and verbal communication skills
- Proven analytical and problem-solving abilities
- Ability to work extended hours, including early mornings, nights, weekends, and occasional holidays, as required to meet project schedules

An Equal Opportunity Employer

Burnsville MN • Scottsdale AZ • Corona CA • Denver CO • Charlotte NC • Carlin NV • West Valley City UT

Working Conditions

- This position is based in Denver, CO but will require travel to project sites across the US. Projects will be nationally based.
- Work is primarily performed on active construction job sites, including highways, roadways, and heavy civil infrastructure projects.
- Regular exposure to outdoor weather conditions, including heat, cold, rain, wind, and dust.
- Position requires walking, standing, climbing, bending, and lifting in a construction environment.
- Frequent interaction with heavy equipment, moving machinery, traffic, and construction hazards; strict adherence to safety protocols is required.
- Use of personal protective equipment (PPE) is mandatory at all job sites.

People are the most important asset at Ames Construction. Ames' non-craft benefits package is designed so that our team members flourish, with medical, dental, and vision (all at one low premium), voluntary benefits, generous retirement benefits, and company holidays and paid time off. Please see the Benefits section of our Careers page for more information.

Base salary range is \$70,000-\$90,000 a year, which varies depending on many factors, including relevant experience, skills, and knowledge.

This job description is not designed to cover or contain a comprehensive listing of activities, duties or responsibilities that are required of the employee for this job. Duties, responsibilities and activities may change at any time with or without notice.
