

Walsh Construction

Company Description

Founded in 1898, The Walsh Group is a fourth-generation family-owned company providing design, build, finance, operation and outfitting services. We are the 13th largest contractor in the United States, operating out of 18 strategically located regional offices across North America. Our three companies are united by a shared dedication to deliver exceptional customer service, while upholding the highest standards of ethics, quality and safety.

Project Engineer Description

Walsh is currently seeking **Project Engineers for our Heavy Civil projects in our California Region.**

Are you someone who thrives on managing production and solving problems? Are you excited about working for a family company where, when you push yourself, you *will* be recognized? For Walsh Project Engineers, a good day is getting everything done on their to-do lists *or* solving a pesky problem. A great day, is when they get to do *both*.

Walsh Project Engineers are easy to follow because they speak with precision, order and efficiency. They get things done because they plan their work and then work their plan. Are you a student that puts the same amount of care into managing relationships as you do into managing your course load? If so, we might have something for you.

As a fourth generation family owned business, Walsh recruits students that will take ownership for ensuring things are handled right. Are you someone who likes to say "yes" to taking on more? Are you someone who gets things started without being asked?

Walsh is looking for Project Engineers who can overcome obstacles and push a project forward. Someone who can take direction, but doesn't always need to be told what to do. Project Engineers that can hold themselves and others accountable while still building strong, personal connections.

If this sounds like you, then we want to hear from you. If you have what it takes, welcome to the family.

Responsibilities

In this role, responsibilities include:

- Document control (RFIs, submittals, change orders, claims, etc.)
- Assisting and supporting project team with daily project coordination
- Procurement of construction materials
