

# NOW HIRING CONSTRUCTION LABORERS

At Aslan Construction we have a reputation for excellence and pride ourselves on providing quality results to our clients. As one of the most respected water and wastewater transmission and treatment construction companies in the Colorado-Wyoming area, we are dedicated to the safety and career development of our employees. With several large projects in the works, we are seeking skilled, dedicated, and motivated laborers to join our team!

Our laborers do a little of everything; including mucking and shoveling concrete, placing rebar, organizing and cleaning tools, shoveling backfill, shooting grades, greasing machines, and operating equipment. Whether you have worked in construction for years or are just getting started in your career, we will meet you where you're at and help you continue to develop your skills!

At Aslan Construction we seek to provide the very best for our team, which is why we keep consistent projects coming in and don't engage in seasonal layoffs. We want all of our employees to have the opportunity to build their careers while also earning a generous benefits package which includes medical and dental insurance, 401K, a health reimbursement account, holidays off, and paid vacation.

If you are looking for a company that you can grow with and that will treat you well, apply today and join the Aslan Construction family!
