Responsibilities:

- Coordination and ownership of all project management tasks both remotely and on-site as necessary.
- Maintaining safety standards
- Work to maintain project budget and schedule
- Ability to multi-task and establish priorities; strong management skills
- Ability to read and understand construction plans Developing/Managing project schedule
- Assess project and identify specifications, cost estimates, and timelines
- Communication with owner, to foster strong relationships
- Prepare proposals and estimates
- Ensure that all inspections are scheduled and conducted in a timely fashion
- Provide consistent, regular project updates
- Commissioning - conducting or contraction expertise to commission the final product (hardware and software verification)
- Create equipment plan under the direction of General Manager
- Oversee equipment installation in the field, when appropriate
- Set up sub-contractors/vendors/employees, facilitate bonds and/or badging

Requirements:

- Strong leadership, management and attention to detail
- Strong organizational skills
- Ability to multi-task
- Strong communication and conflict resolution skills
- Excellent computer skills (MS Office Suite. Microsoft Project, Familiarity with Viewpoint Vista and Oracle software is a plus)
- Strong skills in Microsoft Excel
- Experience with Pivot Tables and VBA is preferred
- Position would be based in Denver, CO with some travel required.

EDUCATION AND EXPERIENCE REQUIREMENTS

- High school diploma or equivalent required.
- College education in engineering or construction management
- Prior experience working in construction management and/or engineering preferred

*Pay will be based upon experience.

A valid driver's license is required

Job Type: Full Time

Salary: \$20.00 to \$40.00 /hour
