

## Martinez Associates ACI Tech

The owner of Martinez was a CMT himself, meaning he knows talent when he sees it. He is very versatile in what his team looks like, however, he is huge on the idea of family and loyalty. Although he is looking to hire at a low rate, he is willing to work with you to get to where you want to be, even if that involves a managerial role. He currently has 2 offices open within the state and is looking to open his 3rd one shortly. Not only does this mean he needs to expand, he also needs employees to step up and hold roles that can help their professional growth.

Martinez works mostly on CDOT projects but does have some clients that pertain to the residential and commercial sectors of land development.

### Description:

The CMT inspector is responsible for materials testing (soil & concrete) on various projects most specifically related to transportation (CDOT). Must be able to Carry 40-45 lbs and have a clean driving record for driving a company truck.
