

Project Engineer

Lithko is where future leaders build their construction careers. As a Project Engineer, you'll join a team that builds some of the most impressive concrete structures in the US. Your dedicated manager and mentors are invested in your success as you learn the fundamentals of concrete construction. Our integration (training) program empowers you to make an impact and quickly advance in your career.

Project Engineer Responsibilities

- Actively utilize your resources, including managers and mentors, to understand the project scope and schedule and the plans for safety and quality.
- Impact the project by developing plans to execute work objectives, track your progress, and replan based on feedback and performance.
- Manage the daily safety, quality, and execution of your work objectives.
- Learn through hands-on performance with our teams through the daily preparation plan and the [project execution process](#).
- Your specific duties will evolve as your skills and interests develop. Throughout your integration, you may be responsible for: estimating, field engineering (line and grade), forming walls and columns, inspections, loadout, place/finish, prep & forming of structural slabs, production tracking, quantity take-offs, slab on grade prep, slab on metal deck prep, and more!

Building Leaders

- We are looking for people with a **drive to excel**.
While hands-on construction experience is a plus, this is an entry-level role in concrete construction! The most successful PE candidates are **action-oriented, collaborative**, and ready to take advantage of **growth opportunities** at Lithko.
- You'll be joining a **team that builds**.
Our job sites can have rough terrain and are operational during inclement weather (as long as it is safe). Your work hours may fluctuate based on the project activities. As an integral part of the team, you have a reliable method of getting to job sites daily and on time.
- We build impressive **structures**.
You will likely perform labor at elevation, sometimes at heights multiple stories above ground level. While on the job site, you may need to lift at least 50 pounds.
- **Safety** is paramount.
Your job offer will be contingent upon a successful drug test.

Lithko Life

- Early Career Talent is integral to Lithko's success as one of the nation's largest concrete contractors. That's why we have a team dedicated to hiring and developing Project

Engineers as they build their careers in concrete construction. Your Campus Talent Specialist will guide you through the interview process and your integration.

- Through our proven integration (training) program, our PEs advance their careers quickly and most are promoted within 13 months of joining the team.
- PEs are eligible for salaried coworker benefits, including paid vacation time, retirement contribution matching, disability coverage, annual reward share, medical, dental, and vision insurance.
- Project Engineer positions are typically available in all our locations, including:
- Atlanta, GA; Allentown, PA; Austin, TX; Charleston, SC; Charlotte, NC; Cincinnati, OH; Columbus, OH; Dallas, TX; Denver, CO; Fayetteville, AR; Greenville, SC; Indianapolis, IN; Kansas City, KS; Lexington, KY; Louisville, KY; Nashville, TN; Oklahoma City, OK; Orlando, FL; Raleigh, NC; Salt Lake City, UT; Tulsa, OK; Upper Marlboro, MD

Qualifications

- You must be legally authorized to work in the US for any employer without sponsorship.
- You will complete a degree in Construction Management, Civil Engineering, or related field before your start date, or have equivalent work or military experience.
