Field Engineer

Job description

The ideal candidate will be involved in the entire operation of the construction site and will report to the onsite Project Manager and assist with all day-to-day tasks. This candidate should be experienced in communicating project milestones with subcontractors and clients alike and be able to establish a timeline for completion.

Responsibilities

- Oversee daily operation of construction projects
- Oversee BMP inspections and maintenance.
- Review plans for issues and answers.
- Maintaining reports including submittals, rfi's and as-built drawings.
- Ensure safety compliance regulations are followed.
- Inspecting work for quality and plan and specification compliance.
- Manage subcontractors and construction site organization.
- Coordinating supplier deliveries.
- Meeting with City and private inspectors.

Qualifications

- Strong project management and communications skills.
- Strong work ethic.
- Thorough knowledge of major aspects in design and construction.
- Read and interpret construction documents.
- Work productively with subcontractors and design team.
- Problem solving, communicating, and working efficiently.
- Strong organizational skills with an exceptional analytical aptitude.
- Strong verbal and written communication skills.
- Honest, a self-starter, driven and prepared to work in a team environment.
- Proficient in the use of MS Office, Procore, Bluebeam and others.
- Execute assigned tasks and responsibilities using technology tools.

Compensation

- Competitive salary based on multiple factors: education, experience, skills, and market rates.
- Bonus program
- Health Care Plan (Medical, Dental & Vision)
- Retirement Plan
- Life Insurance
- Paid Time Off
- Family Leave
- Long Term Disability
- Training & Development
