

## **Entry Level Construction Field Engineer Nationwide**

**Job No.: 20180503001**

Skyler Design Build, LLC ("Skyler") is currently looking for entry level construction field engineers interested in pursuing a career in construction management in its Denver, Colorado operation. This position focuses on development of core-project management skills, with an emphasis on managing commercial and medical construction activities. Daily interaction with the project manager, superintendent, foremen, craft, and owners will provide a unique opportunity to wear several hats during the construction project. Individuals will assist in processing and distributing construction documents, field oversight and labor, health and safety, work processes, field paperwork, design changes, proposals, estimates, and other clerical and administrative tasks. This may include updating the project drawings and specifications, managing requests for information, pay applications, submittals, health and safety items, and close out documents.

On the field side, candidates will work directly with the project superintendent and management team conducting field inspections of system installation, developing and updating construction schedules, learning how to build complex mechanical and electrical systems, learning how to build and maintain medical containment's and ICRA, conducting daily health and safety meetings, attending project meetings, documenting and quoting field changes, managing craft and trades, and updating redlines. On the technical side, you will support and assist with project and equipment inspections, vendor coordination, redlines, equipment startup, commissioning document control, and supporting the commissioning process.

### **Responsibilities**

- Develop pre-construction and construction RFP packages
- Develop process and procedures, training guides, health and safety programs, field logs and protocols,
- Assist or lead in bidding process
- Assist or lead in material takeoffs
- Assist or lead in material management and inventory
- Assist or lead in creating and managing a project budget
- Establish job processes (RFIs, submittals, and pay applications) including approving pay applications and negotiating subcontract change orders
- Ensure that required project documentation is submitted in accordance with the project schedule
