Site Safety Manager

Job Purpose:

Safety is first and foremost in all activities, and this position is a role model for all other contractors to strive to emulate. The role will also ensure proper training of supervision and workers to eliminate unsafe acts before they occur. In addition, the position is responsible to provide support in implementing health, safety, and environmental management policies and procedures at the local site level.

Description of Essential Duties:

- Regularly inspect the work activities at site work locations, yard, warehouses and office maintain a strong safety presence. Help implement and enforce the use of safe work practices and procedures as described in the company safety manuals.
- Evaluate the site to ensure safety management systems are in place and they are complying with legal requirements and company policies and procedures (i.e. Perform audits on JSP, the company S.O.S and E.I.S program, and Daily Toolbox Talks, compliance under the Gold Link Safety Recognition program, Work Instruction development and training).
- Coach employees on working safely. Intervene when unsafe conditions or behaviors are observed. Following company 'Life Saving Rules'.

- Oversee training and knowledge of BrandSafway Policies and OSHA regulations and guidelines to employees.
- Manage stock, distribution and proper inspections of Personal Protective Equipment.
- Maintain clear and concise records of all health and safety related training activities, records of training and certifications in conjunction with the branch safety manager and training admin team.
- Investigate health and safety accidents/incidents/situations to accurately determine the sequence of events and determine root causes. Help supervisors prepare proper documentation in accordance with company and legal requirements. Help ensure that accidents/trends/issues/costs are reported to the proper Aluma authorities as required.
- Complete daily, weekly and monthly reports as required by customers and area leadership.
- Customer Focus Is dedicated to meeting the expectations and requirements of internal and external customers. Gets first-hand customer information and uses it for process improvement. Acts with customers in mind. Establishes and maintains effective relationships with customers and gains their true respect.

Qualification Requirements:

- Minimum 3 years' experience as a safety professional in general industry OR degree in Health & Safety, Construction Management, or related field from an accredited university.
- Extensive up-to-date safety credentials is desirable.
- Must hold a valid driver's license with no driving restrictions
- Good working knowledge of project management techniques and principles.
- Highly organized, with the ability to multi-task in a multiple project environment.
- Good written and verbal communication skills essential to effectively communicate with branch and field personnel, as well as external customers and suppliers.
- Proficiency using Microsoft Excel, Word and PowerPoint.
