Construction Project Engineer Intern

Location: Denver, CO (housing available if needed)
Company: I-KOTA, LLC
Industry: Construction Management / General Contracting

About Us

I-KOTA is a Denver-based general contractor specializing in large multifamily, affordable housing, and mixed-use developments across Colorado. Our projects combine technical complexity with social impact, and our team prides itself on craftsmanship, collaboration, and integrity.

Position Overview

The Construction Project Engineer Internship introduces students to *The I-KOTA Way*—how our teams plan, build, and deliver exceptional projects. This 10-week summer internship provides hands-on exposure to multiple facets of construction, including field work, management operations, and preconstruction. Interns gain real-world experience supporting active projects while learning how successful construction teams coordinate design, budgets, schedules, and quality.

Successful interns may be offered a full-time Project Engineer I position upon graduation.

What You'll Do

- Gain experience in field coordination, management operations, and preconstruction.
- Support Project Managers and Superintendents with daily project activities.
- Review and process submittals, RFIs, and shop drawings.
- Track procurement, deliveries, and field production.
- Participate in estimating, bid development, and cost tracking.
- Assist with site safety and quality control documentation.
- Attend meetings and help document progress and decisions.
- Maintain organized project files and ensure current drawings are distributed.
- Learn I-KOTA's project management and quality control systems.

Who You Are

- Pursuing a Bachelor's degree in Construction Management, Civil Engineering, Architecture, or related field.
- Strong interest in a career in commercial or multifamily construction.
- Excellent communication, organization, and problem-solving skills.
- Proficient in Microsoft Office; experience with Procore or Bluebeam is a plus.
- Basic plan-reading skills and understanding of construction processes.
