

Calcon is looking for Project Engineers to join our Colorado Team!

Calcon Constructors, Inc., headquartered in Englewood is celebrating our 43rd year as a commercial general contractor in Colorado. Emphasizing a one-team approach, Calcon offers preconstruction, design/build, construction management, and general contracting services. All our programs are tailored to meet each client's individual needs. We pride ourselves on skill, integrity, quality, and results.

A Project Engineer is charged with the responsibility of providing technical support to the Project Manager and Superintendent on a project to ensure safe projects and desirable outcomes for our Clients and Company. Since nearly all of our work is negotiated with repeat and referral clients we must ensure that our projects are well planned whether they are small or large.

General responsibilities include:

- Act as the primary point of contact with the Project Manager or Senior Project Manager to ensure work is completed in conformance with project drawings and specifications.
- Assist with pre-construction tasks.
- Coordinate project documents (RFI's, submittals, drawings, etc...), and monitor timely turn-around on these same items.
- Review submittals making sure they are accurately reviewed and coordinated, & materials are being procured in conformance with the project schedule.
- Identify any missing information from construction documents and work through those differences with project team members (Owners, Calcon, subcontractors, Architects).
- Prepare subcontracts / purchase agreements for projects.
- Coordinate subcontractors' work schedules with the project Superintendent.
- Monitor project safety requirements.
- Perform project closeout in conformance with the contract and to the Owners satisfaction.
- Foresee potential problems and organize the team to avoid/resolve issues before they impact the project(s).
- Resolve common project problems to maintain good business relationships and outcomes for Calcon.
- Assist during preconstruction and estimating. Duties to include quantity take-offs and bid leveling
- Assist with project schedule and perform job schedule updates in conjunction with the project superintendent.

Qualifications:

- B.S. degree in Engineering, Construction Management or equivalent field/experience.
- Intern experience required
- Solid computer skills; Proficient in Microsoft Word, Outlook, Excel, and scheduling software.
- Verifiable work references demonstrating exceptional skills and achievements including:
 - High level of professionalism; Dependable, results-focused and ethical
 - History of delivering on projects and commitments and strong communication with internal stakeholders (e.g. Superintendents) and externally with Owner, Architect/Engineer, and subcontractors
 - Strong organization, multi-tasking and planning skills
 - Excellent customer service orientation and verbal written communication skills
 - Successful completion of post-offer background and drug screens
