Project Controls Specialist

Job Purpose:

Project Controllers performs site and area level accounting services, as required, supporting the accurate and timely delivery of information both to company leadership and customers. Manage, coordinate, and maintain business processes and procedures that will promote efficient use of assigned resources and ensure internal control requirements are achieved.

Description of Essential Duties:

- Provide support to project and area managers in planning, managing, and monitoring major projects and accounts.
- Evaluate and monitor the performance and efficiency of jobs and lead efforts to drive site productivity at various sites leveraging local teams, company tools, and personal knowledge.
- Coordinate internal and external reports through gathering, analyzing and summarizing large data sets and information from the project.
- Work on overall project planning through reporting on budgets, schedules and contract deliverables.
- Positively influence and inspire site project teams to enhance site productivity that drives safety culture, margin growth and efficiency.

- Keep track of active project budgets and ensuring that program expenses are strictly monitored against monthly targets.
- Continually define ways to increase customer satisfaction and deepen client relationships.
- Anticipate client needs before they arise and presents solutions to project management that encompasses issues at hand.
- Assist with the development/implementation of internal & external dashboards for measurement of KPIs.
- Ensure accurate forecasting, trending and measuring actuals against Key Performance Indicators (KPIs) consistent with the project contract deliverables. KPIs including but not limited to planning, scheduling, estimating, time & cost controls, safety performance, and information management.

Qualification Requirements:

- Construction Management/Project Management experience OR 4-year degree in Construction Management, Engineering, or another technical field from an accredited university.
- Advanced experience using Excel, Word, & PowerPoint. Experience with database management, PowerBi, or P6 desirable.
- Understanding contracts, standard commercial T&C's, contract compliance, invoice auditing, and estimating/proposal development experience.
- Excellent oral and written communication skills to effectively communicate with employees, customers, and project personnel.
