

Heavy Civil Construction Project Engineer

Rummel Construction, Inc. is seeking Heavy Civil Construction Project Engineers to support our projects around the Southwest.

For 25 years Rummel Construction, Inc. has been providing high quality earthmoving and heavy civil construction services throughout Arizona and the Greater Southwest. We're most well-known for our capability in moving massive amounts of earth safely and efficiently, but we're also involved in work at airports, in the mining industry, transportation sector and more. We don't just manage the work of others, we do most of it ourselves. With over 600 employees and more than 400 pieces of heavy equipment, we've got the tools and experience to get the job done right.

About You

In our work, details matter. As a Project Engineer, assigned to one or more of our projects, you'll be responsible to keep track of the details. From monitoring production quantities to reviewing budgets and schedules, Project Engineers are the hub of information between the field and the office. They're ordering materials, setting up subcontractors, attending customer meetings, supporting the field superintendent and relaying crucial information back to the office. You'll find yourself in the field most days, watching the work unfold in front of you.

You'll be working on the following:

- Creating and maintaining budgets
- Developing Schedules
- Processing Change Orders
- Managing Subcontractors
- Writing Purchase Agreements and Purchase Orders
- Track material quantities
- Source and order materials
- Communicate with owners and inspectors
- Collaborate with Rummel Project Managers and Administrative Staff

This position requires the safe operation of a company vehicle and is therefore a safety-sensitive position.

What are your Qualifications?

- College degree in construction management, civil engineering, or a related field
- Excellent verbal and written communication skills
- Strong personal organizational skills
- Able to manage time appropriately and assign priority to your work duties
- Drug screening

When and Where Do We Work?

We work with the sun. That means during the summer, we start earlier (think 5:30 or 6 AM). During winter we start a little later. Our business is outside, so you should be able to work effectively in all weather conditions (summer heat, winter cold, even the rainy and humid days).

Most of our work is in the Valley, but projects could range as far as California or Colorado. Flexibility and the ability to travel, if needed, is the key. We're a regional company, so don't expect to travel out of the state very often but expect to drive between projects and the office throughout the week.

Why Work With Us?

We are strong believers in opportunity and promotion from within our organization. We want you to be successful in your career and we want you to grow with us. We'll give you the opportunities to put in the work and provide you with the tools to be successful. All that and an excellent benefits package. As a Project Engineer, you will also have use of applicable job tools including a company vehicle, credit card, computer and cell phone.

We offer an excellent work environment including a competitive salary starting at \$75,000, subsidized health insurance, paid time off, paid holidays, Employee Stock Ownership Plan (ESOP), 401k plan, and voluntary dental and supplemental benefits. Rummel Construction is 100% employee owned.

Rummel Construction, Inc. is an equal opportunity employer. All qualified applicants will receive consideration for employment without regard to race, color, religion, creed, national origin, sex, age, pregnancy, genetic information, gender identity, sexual orientation, status as a protected veterans and/or individuals with disability to any position for which the applicant or employee is qualified.
